EASE OF INSTALLATION

In order to simplify the work of the installers, Mavis is divided into two products; the line with base metal DX51D is harder and is recommended for gutter production, while the line with base metal DX53D is softer and malleable, ideal for roofing with double lock standing seam.

ECOLOGICAL AND RECYCLABLE

Mavis is atoxic and **100%** recyclable

UV RESISTANT

UV resistant also at high altitudes. More weatherproof than normal surfaces. More long-lasting.

SCRATCH-RESISTANT

Scratch-resistant to facilitate operator's activity and to achieve a more aesthetic result for his customer.
